

Career Opportunities

Geomatic/Surveying Personnel

4D Nav is currently seeking qualified geomatics/surveying personnel to assist with our expanding quality control (QC) services business offered to the oil and gas industry. These positions will be offshore and office based and may be filled on a contract or employee basis. Personnel selected for these roles will represent major oil companies by performing technical QC in support of pipeline surveys, rig moves, metrology surveys, multibeam surveys, topside installations, and project management.

Candidates should have at least 10 years' experience in offshore oil and gas operations and be competent in survey theory and methodology. A degree in geomatics/engineering is a bonus and a valid driver license, passport, UK physical, TWIC, and HUET training are essential. Personnel are expected to be team players, self-motivated, and to present themselves in a professional manner.

4D Nav is a technology-based geomatics and engineering company providing solutions in the offshore industry. We have pioneered techniques and software that are on the leading edge in an ever-evolving industry. We are based in Houston Texas and cover the globe with ongoing operations in the Gulf of Mexico, South America, West Africa, United Kingdom, and Norway.
